

# Release Plan

---

Prepared by: Jennifer Emiliani

## Revision History

---

| Author            | Date       |   |
|-------------------|------------|---|
| Marchi Enrico     | 31/10/2019 | Initial Release                             |
| Gaole Elia        | 07/11/2019 | Added Grafic User Interace                  |
| Gaole Elia        | 15/11/2019 | Login Interface implementation              |
| Grippi Giulio     | 22/11/2019 | Added ControlMessages, GroupUsers and Con   |
| Emiliani Jennifer | 28/11/2019 | Logout Interface implementation             |
| Emiliani Jennifer | 03/12/2019 | PCPclient implementation                    |
| Marchi Enrico     | 03/12/2019 | Registration method and Login method implem |
| Bulai Matteo      | 04/12/2019 | Update PCPLogin and PCPLogout               |
| Gaole Elia        | 04/12/2019 | Added the user_pane to the PCPClient window |
| Grippi Giulio     | 07/12/2019 | Upgrade graphic design                      |
| Marchi Enrico     | 12/12/2019 | Fixed all the bugs                          |

## Release Summary

---

### Initiation

Iteration #1 (31/10 - 7/11): First basic implementations

### Elaboration

Iteration #2 (10/11 - 24/11): Implementation of all necessary classes

## Construction

Iteration #3 (26/11 - 03/12): Implementation of all necessary interfaces  
Iteration #4 (03/12 - 05/12): Implementation of all necessary methods  
Iteration #5 (05/12 - 08/12): Improvements on the whole project

## Transition

Iteration #6 (09/12 - 12/12): Fix bugs and project ready for distribution

## Iteration 1

---

**Objective:** The purpose of this iteration is to initialize the program.

| Features / Activities / Deliverables                   |       |
|--|-------|
| Welcome screen   | 5hrs  |
| Division of duties                                     | 5hrs  |
| Choices for the graphic user interface                 | 20hrs |
| Start the implementation of the graphic user interface | 25hrs |
| Totals:  | 55hrs |

## Iteration 2

---

**Objective:** The purpose of this iteration is to implement all the classes according to the established division of labour.

| Features / Activities / Deliverables        | Esti  |
|---|-------|
| Implementation of all the classes           | 20hrs |
| Detailed descriptions of critical use cases | 20hrs |
| Totals:                                     | 40hrs |

# Interaction 3-4-5

---

**Objective:** The purpose of this iteration is to implement all methods and interfaces according to the established division of labour.

| Features / Activities / Deliverables                              |
|---|
| Implementation of all the interfaces                              |
| Implementation of all the methods                                 |
| Changes to improve the graphic and the functioning of the program |
| Totals:   |

# Features not scheduled but under consideration

---

| Features                                    |
|---|
| Fixed all bugs of the program               |
| Meetings to understand the progress of work |
